AFFIDAVIT OF KARL KORSMO

Karl Korsmo, being first duly sworn upon oath, deposes and states as follows:

1. My name is Karl Korsmo, and I serve as Vice President, External Affairs, AT&T Wireless Services, Inc. My business address is P.O. Box 97061, Redmond, Washington 98073-9761. I am an authorized representative of subsidiary licensees of AT&T Wireless Services, Inc., including AT&T Wireless PCS of Cleveland, LLC; AT&T Wireless Services of Washington, LLC; Spokane Cellular Telephone Company; Yakima Cellular Telephone Company; Bremerton Cellular Telephone Company; Olympia Cellular Telephone Company, Inc.; Bellingham Cellular Partnership and Hood River Cellular Telephone Company, Inc (collectively, AWS). I have read the foregoing Petition for Designation as an Eligible Telecommunications Carrier and all information therein is true and correct to the best of my knowledge, information and belief.

2. AWS is authorized to provide commercial mobile radio service ("CMRS") in Washington pursuant to the FCC's rules. AWS is a common carrier consistent with the definition in 47 U.S.C. § 153(10) and the requirements of 47 U.S.C. § 214(e).

3. AWS seeks to obtain universal service support available in certain areas by rural and non-rural incumbent local exchange carriers in Washington. As required, this funding will be used only to support the provision, upgrading, and maintenance of AWS' wireless network in Washington. As set forth in the Petition, this support will assist AWS in providing basic telecommunications services to low income consumers, and to consumers in high-cost areas, and will allow AWS to continue to upgrade and expand its state-of-the-art wireless network in Washington.

~~4. AWS offers all the services and functionalities supported by the federal universal~~
service program, as set forth in Section 214(e) of the Act and Section 54.101(a) of the FCC's
rules, throughout the service areas for which it seeks ETC designation in Washington.

5. Voice-grade access to the public switched network. The FCC has concluded that
voice-grade access means the ability to make and receive phone calls, within a specified
bandwidth and frequency range. AWS meets this requirement by providing voice-grade access
to the public switched telephone network. Through its interconnection arrangements with local
exchange carriers, all customers of AWS are able to make and receive calls on the public
switched telephone network within the specified bandwidth.

6. Local usage. ETCs must include an amount of local usage free of charge to end
users. AWS will include local usage in all of its universal service offerings.

7. Dual-tone multi-frequency ("DTMF") signaling, or its functional equivalent.
DTMF is a method of signaling that facilitates the transportation of call set-up and call detail
information. AWS provides out-of-band digital signaling, which is functionally equivalent to
DTMF.

8. Single-party service or its functional equivalent. AWS meets the requirement of
single-party service by providing a dedicated message path for the length of all customer calls.

9. Access to emergency services. The ability to reach a public emergency service
provider by dialing 911 is a required service in any universal service offering. AWS currently
provides its subscribers with access to 911 emergency services in accord with this requirement,
and consistent with FCC regulations throughout the service area for which designation is sought.
AWS also provides Enhanced 911 services, including Phase I and Phase II E-911 services, where
requested by local public safety authorities who are able to receive the information.

~~10. Access to operator services. Access to operator services is defined as any~~
automatic or live assistance provided to a consumer to arrange for the billing or completion, or both, of a telephone call. AWS meets this requirement by providing all of its customers with access to operator services.

11. Access to interexchange service. AWS meets the requirement of access to interexchange service by providing all of its customers with the ability to make and receive interexchange calls.

12. Access to directory assistance. AWS provides all of its customers with access to directory assistance by dialing "411."

13. Toll limitation for qualifying low-income consumers. Toll limitation is either "toll control" or "toll blocking." 47 C.F.R. § 54.101(a)(9). An ETC is not required to provide both services if it is incapable of providing both. AWS cannot provide toll control, but can provide toll blocking. Once designated as an ETC, AWS will participate in Lifeline as required, and will provide toll blocking capability at no additional charge to Lifeline customers.

14. An ETC offers the supported services "either using its own facilities or a combination of its own facilities and resale of another carrier's services." AWS provides the supported services using primarily its own network infrastructure, which includes the antennas, cell-sites, towers, trunking, mobile switching, and interconnection facilities owned or leased by the Company.

15. AWS advertises the availability of the supported services and the corresponding charges in a manner that informs the general public within the designated service area of both the services available and the corresponding charges. As an ETC, AWS will advertise its services

~~through many media of general distribution throughout the service areas for which designation is~~
requested.

16. Telecommunications carriers in Washington are required to participate in Lifeline and Link Up and WTAP Programs. AWS will participate in the programs in accordance with 47 C.F.R. §§ 54.400 through 54.415, RCW 80.36.410 through 80.36.475, and Chapter 480-122 WAC.

17. AWS requests ETC designation for the service areas in Washington identified as Exhibits B and C and shown on the map attached as Exhibit D.

18. Designating AWS as an ETC will serve the public interest by promoting additional deployment of wireless facilities and services to the high-cost areas in Washington, and bringing consumers in those areas the benefits of additional competitive universal service offerings. Additional discussion of the public interest is contained in paragraphs 34 through 46 of the Petition.

19. Granting AWS' Application is consistent with RCW 80.36.300, which provides it is the policy of the state to: (1) Preserve affordable universal telecommunications service; (2) maintain and advance the efficiency and availability of telecommunications service; (3) ensure that customers pay only reasonable charges for telecommunications service; (4) ensure that rates for noncompetitive telecommunications services do not subsidize the competitive ventures of regulated telecommunications companies; (5) promote diversity in the supply of telecommunications services and products in telecommunications markets throughout the state; and (6) permit flexible regulation of competitive telecommunications companies and services.

~~20. High Cost Certification. AWS certifies that all high-cost universal service~~
support received in Washington will be used only for the provision, maintenance and upgrading
of services and facilities for which the support is intended.

21. This concludes my affidavit.

I hereby declare under penalty of perjury under the law of the State of Washington that
the foregoing is true and correct.

Executed on Feb. 18, 2004.

**Re: High Cost Certification of AT&T Wireless PCS of Cleveland, LLC, AT&T Wireless Services of Washington, LLC, Spokane Cellular Telephone Company, Yakima Cellular Telephone Company, Bremerton Cellular Telephone Company, Olympia Cellular Telephone Company, Inc., Bellingham Cellular Partnership and Hood River Cellular Telephone Company, Inc.
Docket No. UT-043011**

Dear Ms. Washburn:

The certifications below are provided pursuant to the WUTC's Order Requiring Filing By Eligible Telecommunications Carriers Receiving Federal High Cost Support, dated and effective as of July 25, 2001 and WAC 480-120-311.

On behalf of AT&T Wireless PCS of Cleveland, LLC, AT&T Wireless Services of Washington, LLC, Spokane Cellular Telephone Company, Yakima Cellular Telephone Company, Bremerton Cellular Telephone Company, Olympia Cellular Telephone Company, Inc., Bellingham Cellular Partnership and Hood River Cellular Telephone Company, Inc. ("AT&T Wireless"), I hereby certify under penalty of perjury under the laws of the State of Washington that all high-cost support provided to AT&T Wireless for the 2004 calendar year will be used only for the provision, maintenance, and upgrading of facilities and services for which the support is intended, pursuant to Section 254(e) of the Telecommunications Act of 1996.

On March 12, 2004, the WUTC voted to grant Eligible Telecommunications Carrier ("ETC") status to AT&T Wireless. While no written order has been issued at the time of the signing of this letter, AT&T Wireless' eligibility to receive certain high cost support for the third and fourth quarters of 2004 is dependent on the FCC and USAC receiving a certification from the WUTC on or before April 1, 2004. See 47 C.F.R. § 54.314(d)(3). AT&T Wireless requests that if a written order is issued in this Docket on or before March 30, that the WUTC transmit a letter to the FCC and USAC in the form of the letter attached hereto as Exhibit A. If no written

Carole J. Washburn, Executive Secretary
March 24, 2004
Page Two

order has been issued at that time, AT&T Wireless requests that the WUTC transmit a letter to the FCC in the form of the letter attached hereto as Exhibit B. In either case, the letter would need to be received by the FCC and USAC on or before April 1.

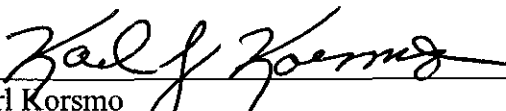

At present, AT&T Wireless has not been designated as an ETC and has not previously received federal universal service support in the State of Washington.

Immediately upon designation, AT&T Wireless will provide all of the supported services required by 47 U.S.C. § 214(e) and the Commission's Order. AT&T Wireless is capable of providing, and will continue to provide all of the supported services for the remainder of calendar year 2004. AT&T Wireless will advertise the availability of supported services and the charges for them as required by 47 U.S.C. § 214(e) and the Commission's Order, and will continue to do so during calendar year 2004.

In accordance with the WUTC's July 25, 2001 Order, AT&T Wireless will submit line counts to USAC prior to April 1, 2004, reporting 876,615 lines within areas contained within its Petition.

AT&T Wireless will submit an additional certification for calendar year 2005 prior to August 31, 2004.

I certify under penalty of perjury under the laws of the State of Washington that the foregoing is true and correct.

Karl Korsmo
Vice President, External Affairs
Signed at Redmond, Washington on March 24,
